Lamb Feeding Tube	NurseMate ASAP	Wool Shears	Antibiotics
Lamb Coats	Flashlight/Headlamp	Vet Phone Number	Cell Phone

The Lamb/Kid Resuscitator is a constant delivery resuscitator, designed to inflate the lungs of newborns that are unable to breathe, but have a heartbeat. The aspirator mask is attached to the wide end of the pump to draw out mucus or fluids that may be blocking the airway. Once clear, the aspirator mask is removed, and the resuscitator mask is attached to the narrow end of the pump. (We highly recommend this device as a MUST HAVE in every lambing kit.)

NurseMate® ASAP milk replacer is a rich source of colostrum, proteins, and other nutrients
