

# Vaccines

---

Medication	Dose
<b>CD-T</b>	2ml SQ; repeat 21 days; repeat annually 3-4 weeks prior to lambing.
<b>Chlamydia</b>	30-60 days prior to breeding to avoid abortion
<b>Fusogard</b> (foot rot) ***does not work well	2ml SQ (6 months of age); repeat 21 days; repeat annually or whenever conditions expected.
<b>Tetanus</b>	300 IU at docking and castration (do not castrate in first 24 hours; leads to decreased colostrum intake leading to watery mouth disease)
